

## FALL GARMENTS

Hundreds of people are looking into our show windows these days, viewing the Fall Styles and we hear many admiring comments on the beauty and excellence of our new clothes. We take great pleasure in showing the new style features and fabrics to men who are interested in, and who appreciate good clothes.

## The Golden Rule

### WATERS HEAVY WITH PERFUME.

Remarkable Lake to Be Found in the Caspian District.

"Grasse, clinging to its Alp, high above the Mediterranean, is supposed to give the stranger a headache on account of its perfume at this season," said a perfumer. "Grasse makes the world's perfumes. You see mountains of flowers there, as, in a milling country, you see mountains of wheat. The odor is powerful, but as far as headaches—no!"

"But in the Caspian district there is a lake so strongly perfumed that if the stranger boats on it or swims in it he really gets a headache. This lake's banks are of white salt crystals, its waters are mauve in color, and from it an odor of violets is exhaled."

"It is Lake Mankishlak. I visited it to see if I couldn't bottle it up and put it on the perfume market. No go."

"You see, it is the presence of the seaweed Polydactylia violacea that gives the lake its hue and smell. When you bottle the waters the seaweed atoms, after a few days, die and rot. Then the odor changes from violet to—pah!"

"But if you are ever in the Caspian, visit the Mankishlak peninsula and take a look at the lake. It is in its way as curious as the asphalt lakes of South America."

### HORSE'S HOOF LIKE TOE NAIL.

Grows on Average Third of an Inch Every Month.

Few persons realize that a horse's hoof is really the same thing as the toe nails of human beings or of animals having toes. The horn of a hoof grows just as a toe nail does.

The hoof grows more rapidly in unshod horses than in those wearing shoes. And it grows faster in horses which are well groomed and well fed. But on the average the horn grows about a third of an inch a month.

Hind hoofs grow faster than fore hoofs. The toe of the hoof being the longest part, it takes longer for the horn to grow down there than at the heel. For instance, the toe will grow entirely down in from 11 to 13 months, while the heel will grow down in from three to five months.

As the new horn grows out any cracks or defects in the old gradually work down to where they can be cut off, just as with human finger nails, you can watch the progress of a bruise from the root to the tip.

### THE WHOLE THING IN A NUTSHELL

A house is, or is not, desirable as a residence or an investment; is, or is not, worth the money asked for it. See our list of properties themselves—and deliberately decide if what we have to offer is, or is not, a bargain. You know we rent and collect rents, too.

## The Marchioness Coat

FOR DAY AND EVENING WEAR

No other garment has ever attained the wide popularity accorded the Marchioness, an exclusive model evolved by the WOOLTEX designers from an approved Parisian design.

The Marchioness may be worn with appropriateness on any occasion.

As a theatre, opera, or evening wrap, when visiting or shopping, it is equally correct in style.

We submit the Marchioness in a broad range of fabrics and colorings, and with plain or elaborate decorations.

The Prices are Reasonable
